

IMPLEMENTATION OF E-COHESION

General characteristics

BULGARIA

No. of **targeted national/regional operational programmes** covering ERDF/CF: **5**

No. of **e-Cohesion systems**: **1**

At a glance:

e-Cohesion system: UMIS (ИСУИ)

Introduction of the system: Operational since 2014.

Type of the system: National system - it covers all national/regional OPs and does not support any Interreg programmes.

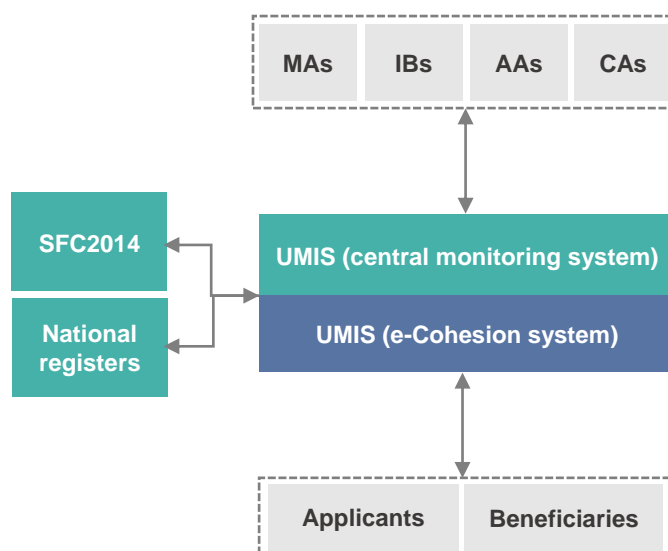

Implementation mode: Highly centralised.

Use during 2021-2027: Ongoing development (based on existing system).

Fund coverage of the system: ☒ ERDF ☒ CF

Context and structure of e-Cohesion

- E-Cohesion in Bulgaria is **highly centralised** - UMIS is the only system used in the country and covers all five national/regional OPs;
- UMIS is closely integrated with Bulgaria's **central monitoring system for ESIF** and other **national governmental registers** (social insurance registry, register of legal entities);
- UMIS is also integrated with the **European Commission's System for Fund Management (SFC2014)**;
- UMIS supports all processes related to project implementation as well as the application process;
- The use of UMIS is not mandatory but it is the **officially provided solution** for project application and management;
- UMIS supports the use of a **qualified e-signature**.

Implementation of e-Cohesion

Principles: Interoperability and once-only encoding

- UMIS supports once-only encoding.** Data and documents provided by beneficiaries are shared with all relevant authorities;
- UMIS supports the pre-filling of information:** Information is pre-filled based on data entered during the project application and during previous steps of the operation and from some national registers.

e-Cohesion features: Coverage of processes and functionalities

- UMIS supports all operations related to project application and implementation** (progress reports, modification requests, payment claims and management verifications / on-the-spot checks);
- UMIS supports all functionalities associated with user-friendliness** (interactive forms, automatic calculations, checks for incorrect/missing data, system-generated alerts, online status tracking, validity of e-signature and availability of previous data).

Please note that this fiche is not informed by the survey results. We did not receive enough responses, therefore, the information presented in this fiche builds on desk research and additional information received from relevant authorities.
