

JUST TRANSITION PLATFORM MEETING

COAL REGIONS IN TRANSITION VIRTUAL WEEK

CARBON-INTENSIVE REGIONS SEMINARS

15 - 17 NOVEMBER 2021

Introduction to the Just Transition Platform Working Groups

Dr **Sander Happaerts**DG REGIO, Smart and Sustainable Growth Unit

4th Just Transition Platform meeting, 15 November 2021

The Just Transition Platform (JTP)

- Assist all stakeholders in accessing JTM support
- High-level JTP events help to:
 - share knowledge and good practices
 - support capacity-building and exchanges across sectors
 - provide advice on just transition to authorities and stakeholders involved in JTM-related activities
- Dedicated webpage with helpdesk and database of projects and experts
- Working groups for carbon intensive-regions
- Link to Coal Regions in Transition initiative (dedicated work stream for coal, peat, oil shale regions)

Fossil fuels production and fossil fuel based energy generation Carbon-intensive industries Both of the above Madeira **REGIO**qis © EuroGeographics Association for the administrative boundaries

Commission recommendations for JTF scope

JTF in carbon-intensive regions

- The transition to a climate-neutral Europe in 2050 will not only affect coal regions or declining sectors
- Sectors with high carbon-intensity are expected to undergo significant transformation
 - > for instance steel, metals, cement, chemicals...
- JTF will support territories that are heavily dependent on carbonintensive industries...
- ... and that experience a negative impact from the transition by 2030 or before, such as:
 - > social impacts, linked to unemployment or needs for reskilling
 - **economic** impacts, linked to changes in production patterns
 - > demographic, health or environmental impacts

Addressing knowledge gaps

- What are the pathways of carbon-intensive industries, and which impacts will this have in EU regions?
 - Calculations of regional employment impact of EU ETS installations (https://europa.eu/!nkXRqB)
 - Regional industrial transitions to climate neutrality: sectors, locations and socio-economic impacts (ongoing study by OECD)
- How can we make sure that this transition happens in a fair way?
 - Working Groups on carbon-intensive regions
 - Knowledge capitalisation work of the Just Transition Platform

REGIONAL INDUSTRIAL TRANSITIONS TO CLIMATE NEUTRALITY

Andrés Fuentes Hutfilter & Jolien Noels

12 November 2021

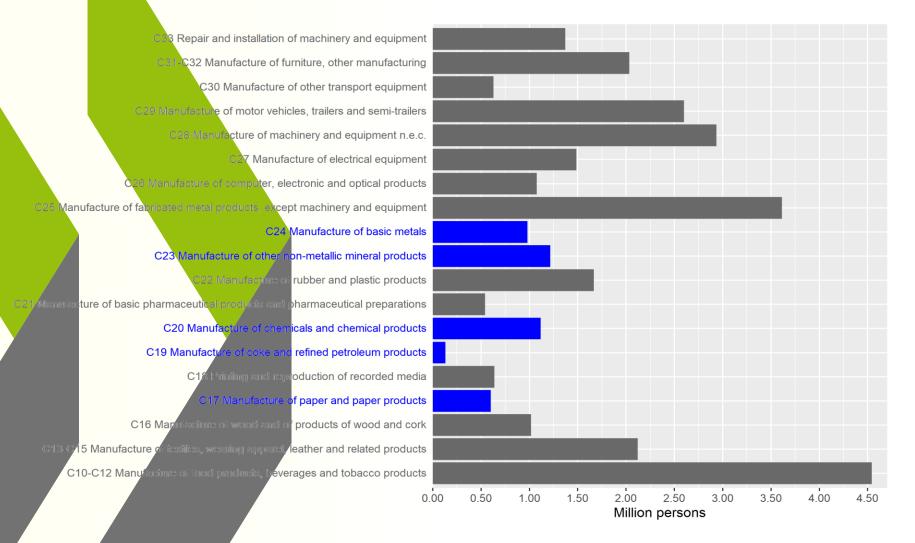

Centre for Entrepreneurship, SMEs, Regions and Cities (CFE)

About

- Ongoing work
- This work is supported by the European Commission, DG Regio

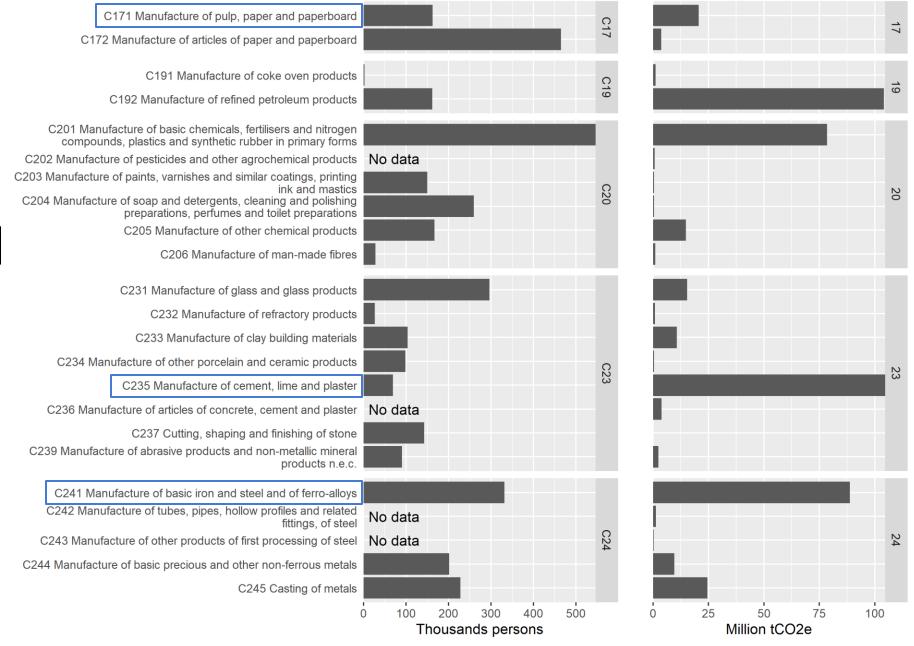

Employment in hard-to-abate industry

Key activities often nested within the selected 2-digit sectors

Source: Eurostat

Emissions concentrated in 3-digit subsectors

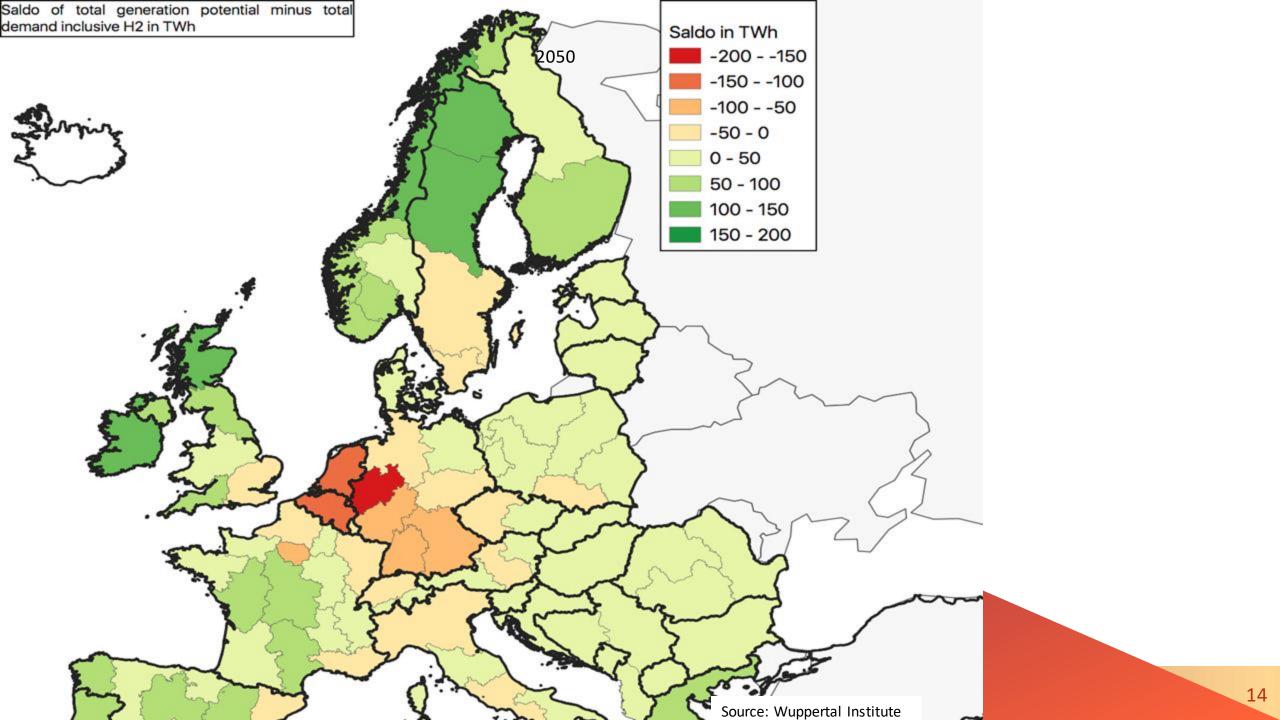

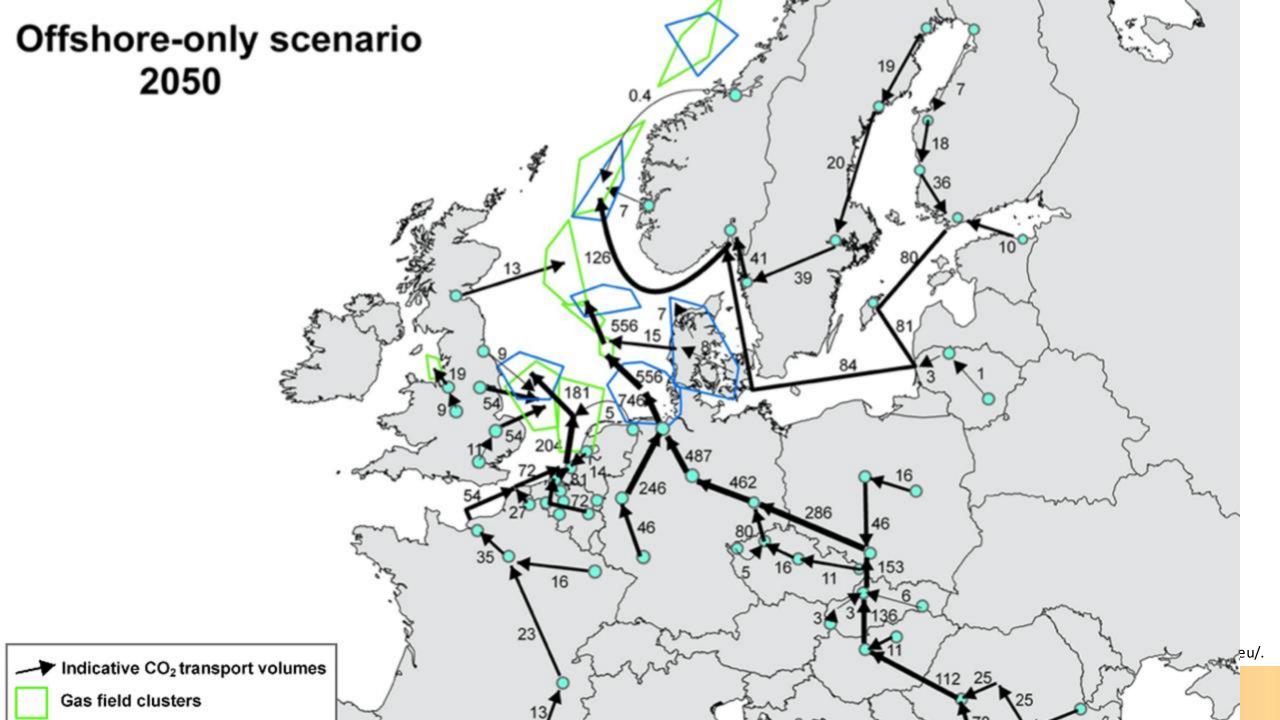

Source: Eurostat and EU-ETS/ORBIS matched dataset

Sectoral challenges for regional development

- Refined oil products and coke: biggest relative employment loss
- Cement: most dependent on CCS.
- hemica: biggest demand for hydrogen, followed by Steel
- Paper and pulp: to face competition for biomass

The CIRCULAR ECONOMY will reduce some of these pressures.

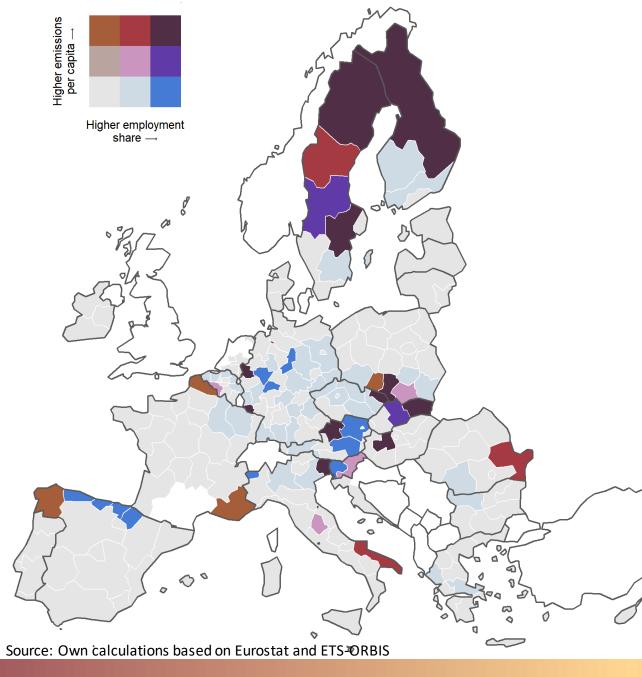

Identifying regions: Basic metals

Both employment shares and emissions per capita are indicators for the intensity of needed transformations in heavy industry

Focus on 2 processes in basic metals: steel and aluminium production

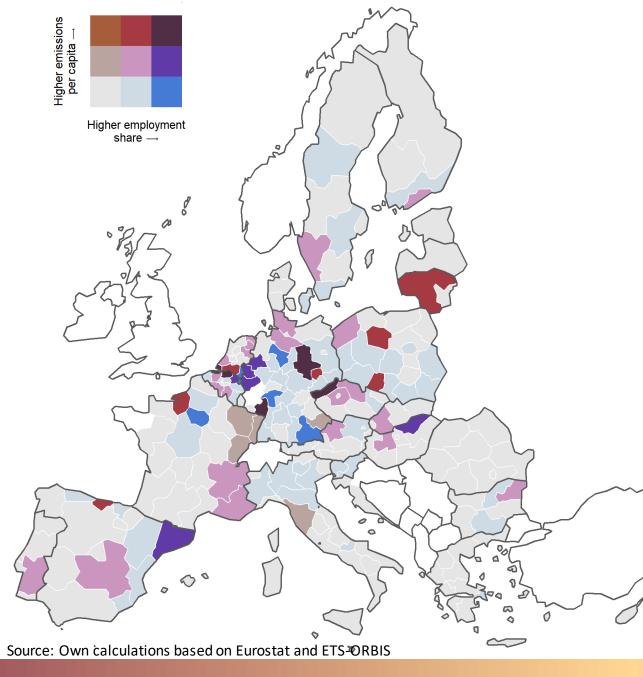

Steel plant conversion to hydrogen may be challenging due to geographical dispersion

Identifying regions: Chemicals

High employment shares and emissions per capita in chemical manufacturing are mostly in Central and Western European regions

Both indicators need not coincide: HQ regions vs production sites vs ...

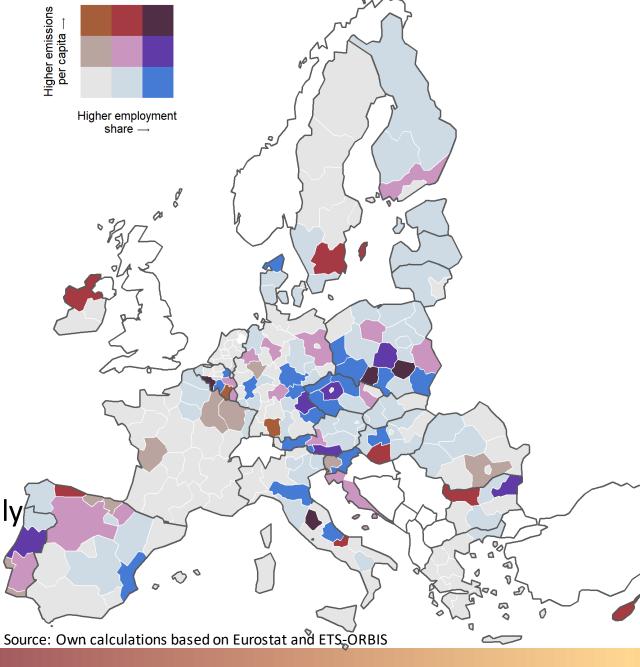

Identifying regions: Other non-metallic mineral products

Focus on cement

Many regions with high employment shares but also driven by glass and ceramics etc.

High emissions per capita reflect more emissions-intensive activity in cement only

Thank you!

The JTP Working Groups in practice

Elodie Salle, JTP Secretariat

Monday 15 November 2021

JTP Working Groups

Overall objective:

WGs will establish a cooperation between the European Commission, Member States and stakeholders on questions related to the implementation of Territorial Just Transition Plans with a special focus on the relevant sectors

Main milestones:

- To gather varied groups of stakeholders around a specific topic
- To develop a common just transition vision with stakeholders
- To define a strategic approach on stakeholders' engagement when the Territorial Just Transition Plans are implemented in the regions impacted by the transition

JTP Working Groups

- 3 WGs on carbon-intensive sectors:
 - Steel
 - Cement
 - Chemicals
 - → <u>Main output</u>: action plans addressing issues faced by regions implementing low-carbon transition
- 1 WG on Horizontal Stakeholder Strategy (cross-cutting)
 - → <u>Main output</u>: stakeholder engagement strategy to involve society in a cross-cutting manner in the implementation of the TJTPs

Membership

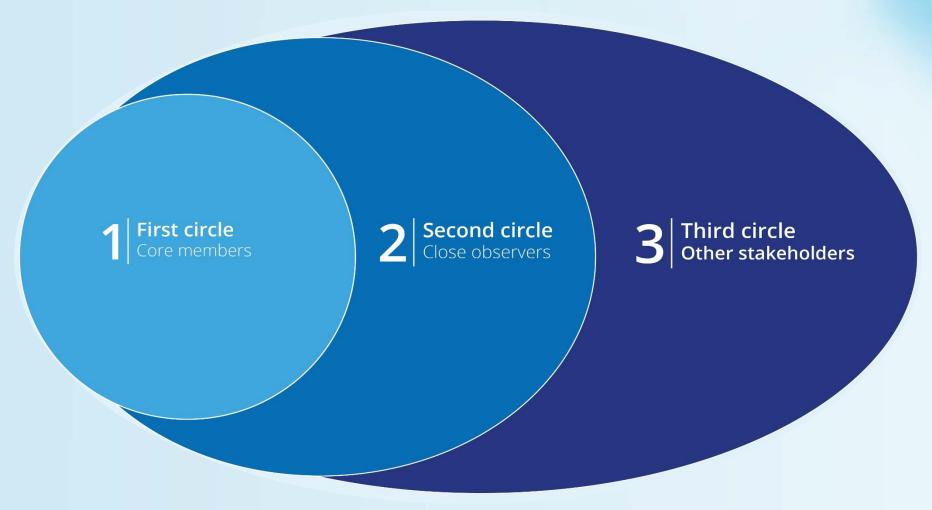

Members of the Working Groups are:

- A) Member States' authorities
- B) Local and Regional authorities
- C) Associations representing regional, local, urban and other public authorities
- D) Organisations representing economic and social partners
- E) Bodies representing civil society, such as NGOs

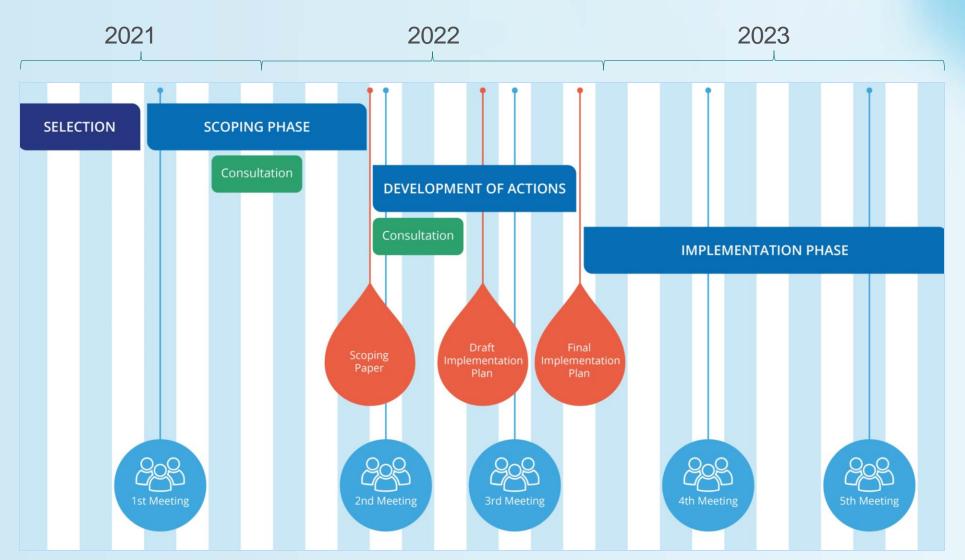

Membership

Timeline

Outcomes and deliverables

The WGs are expected to produce the following outcomes and deliverables:

- 1) Scoping Paper, outlining the priority theme(s) identified by the WG, its objectives and expected results
- 2) Draft Implementation Plan, including the set of provisional actions, how the WG plans to execute the actions and rationale for why the actions are important for the priority theme(s)
- 3) Final Implementation Plan, including the final set of actions to be implemented by the WG
- **4) Actions**, for which implementation will be lead by one or more Action Leader

WG meetings

Each WG will meet twice a year:

- First meeting will kick-start the work of the WG (Scoping phase)
- Second meeting will aim at identifying and defining the provisional set of actions (Development of actions)
- Third meeting will serve to agree on the final set of actions to be included in the Implementation Plan (Development of actions)
- Fourth and fifth meeting will be dedicated to discuss the progress in realising the Implementation Plans (Implementation phase)

Whenever possible, the WG meetings will be organised back-to-back with the JTP event.

JTP Secretariat

Each WG is supported by a **dedicated Secretariat** who will support in facilitating its activities.

The support activities provided are the following:

- Strategic support (e.g. providing advice and guidance, monitor WG activities and progress)
- Operational support (e.g. develop templates for deliverables, provide and manage a WG shared platform, organise the meetings and consultations)
- Thematic support (e.g. needs assessment, collection of good practices, identification of gaps per sector)
