In this context, this action contributes in particular to pursuing objective 3.5. - territorial development strategies - of REGIO Strategic Plan, whereby REGIO will foster the implementation of the Communication 'A stronger and renewed strategic partnership with the outermost regions', and of Article 349 TFEU which provides for tailor made support to these regions, including in the application of EU law and access to EU programmes. The actions that could be developed by the OR under EU programmes can in addition contribute to the implementation of the European Green Deal and the EU Strategies on Adaptation to Climate change, Biodiversity and Blue economy as well as the Circular Economy Action Plan amongst other EU strategies.</p>	Procurement	Meetings and Conferences

22CPR022	Support for Border Focal Point outreach	BORDER FOCAL POINT PUBLICATIONS AND EXTERNAL OUTREACH	ERDF	25.000,00	<p>The implementation of the Border Focal Point work program leads to the creation of diverse types of publications targeting different audiences (e.g. academia; local administrations; EGTCs, euroregions, etc) and of different types (from EU official publications to articles in academic journals). Given their heterogeneity, implementation requires punctual specific types of assistance, for example to ensure public accessibility (open-access fees) or directly related to the production (graphic design; video editing; etc).</p> <p>External outreach occasionally implies participation in events organised by third parties (eg. academic conferences). This action would also support direct cost related with those events.</p>	Procurement	Communication and publication

That element was not yet present in COM(2017)534.</p> <p>Important changes in European legislation have consequences for cross-border regions.</p> <p>The Electricity Market Directive (Directive (EU) 2019/944) already allows national regulatory frameworks to open up citizen energy communities to cross-border participation. Likewise the Renewable Energy Directive does the same in renewable energy communities. However, these energy communities are a relatively recent phenomenon and their implementation in a cross-border context is still limited and patchy. The related challenges are not fully understood or assessed.</p> <p>This action will allow for a deep analysis of the specific context faced by such communities in a border context. This will lead to the production of guidelines for the implementation of those communities.</p>	Procurement	Technical and other administrative assistance to MS
22CPR024	Follow up to the b-solutions initiative	THE ACTION WILL ALLOW PROVIDING DIRECT SUPPORT TO IMPLEMENT SOLUTIONS TO SPECIFIC CROSS-BORDER OBSTACLES ASSESSED VIA THE B-SOLUTIONS INITIATIVE.	ERDF	400.000,00	<p>Following the 2017 Communication "Boosting Growth and Cohesion in EU Border Regions" the Commission implemented the b-solutions initiative to assess the root causes of border obstacles and to provide pathways for possible solutions to those obstacles. The EC report "EU Border regions: living labs of European integration" reinforced the need to intervene in solving such obstacles. In a similar vein the "Single Market Enforcement Taskforce" set up by DG GROW is also working to address cross-border barriers to the implementation of the Single Market.</p> <p>The experience so far with the 90 obstacles assessed by the b-solutions initiative is that, in many cases, going from identifying the solution to actually implementing the solution requires more dedicated action.</p> <p>This action will allow providing direct support to the solution implementation phase of some of the cases assessed by the b-solutions initiative.</p>	Procurement	Technical and other administrative assistance to MS

ERDF	88.000,00	Procurement by the beneficiaries should follow the Financial Regulation for the whole programme area (i.e both on the Member State and IPA beneficiary). In this context, the use of PRAG may be envisaged but remains optional. In practice, only Romania (RO-RS MA) and Hungary (HU-RS MA) have opted for a single set of procurement rules for the entire eligible area. For the post 2020, Romania even envisages a single set of rules applying to all ETC and IPA CBC programmes. The RO MA sees three main advantages: building trust between beneficiaries, ensuring equal treatment and favouring the same pace of project implementation. The solution proposed by the Romanians presents some clear advantages but might not fit to all situations. The study should help to identify the practical challenges and the areas of simplification and streamlining, and proposes mitigation measures for both primary and secondary public procurement procedures. IT IS THE PRIME ANNUAL EVENT IN THE "MRS WORLD" WHERE EVERYONE WITH A ROLE IN THE PROCESS PARTICIPATES.	ERDF	200.000,00	The objective of this TA initiative is to create a platform for MRS stakeholders, contributing to Specific objective 3.5: Effective sustainable urban and territorial development strategies involving local stakeholders and citizens of the REGIO Strategic Plan 2020-2024. It helps to support territorial, economic and social cohesion in Europe through the implementation of the four macro regional strategies (MRS), i.e. the EU Strategies for the Baltic Sea Region, for the Danube Region, for the Adriatic and Ionian Regions and for the Alpine Region. These strategies provide integrated frameworks to address together across borders common challenges faced by a defined geographical area. ERDF	75.000,00	For the 2021-2027 period, programmes have been encouraged to envisage the use of financial instruments in specific areas (support to businesses, energy efficiency, etc.), possibly in combination with a grant component. Potential barriers include: the need for a critical mass, insufficient capacity of the MA, state aids rules, selection of fund of funds managers and financial intermediaries. The study should identify and summarise the financial instruments most tailored to Interreg IPA programmes through mapping the ones developed by the MS in implementing the ERDF and the CF in the 2007-2013 and 2014-2020 programming periods. The contractor should also provide IPA programme-specific recommendations and discussion elements for REGIO.D1 in the context of the implementation of Programmes for the 2021-2027 programming period. 22CPR110	Fraud prevention actions for Interreg IPA programmes	IN LINE WITH THE JOINT ANTI-FRAUD STRATEGY FOR 2020 – 2025, THE ACTION SHOULD HELP ALL INTERREG IPA PROGRAMMES TO STRENGTHEN THEIR FRAUD PREVENTION ACTIONS, SUCH AS SUPPORT TO UPDATE OF RISK ASSESSMENT, ANTI-FRAUD POLICIES AND SYSTEMATIC USE OF IT TOOLS.	ERDF	60.000,00	REGIO together with EMPL and MARE adopted in December 2019 an updated Joint Anti-Fraud Strategy for the period 2020 – 2025 (Ares(2019)7845154). It sets out a series of capacity building measures including fraud prevention actions, such as support to update of risk assessment, anti-fraud policies and more systematic use of IT, to be implemented in cooperation with the programme authorities, and internally, in close cooperation with OLAF. Considering that Interreg IPA programmes involve IPA countries, which might present sometimes some set-up fragility, which do not meet accession negotiation chapter 32 requirements yet and which have to apply a combination of ERDF and IPA requirements, REGIO.D1 considers that all the Interreg IPA programmes should be considered for further action on capacity building, risk analysis and proportionate anti-fraud policies. 22CPR111	Assessing stakeholders' engagement and the partnership principles in the IPA countries for future ES	ADMINISTRATIVE CAPACITY HAS BEEN IDENTIFIED AS A FUNDAMENTAL FACTOR BEHIND THE PERFORMANCE OF EU FUNDS, ESPECIALLY THOSE UNDER COHESION POLICY. SUCCESSFULLY MANAGING AND ADMINISTERING THESE FUNDS RESTS ON THE EFFECTIVE GOVERNANCE OF THE INVESTMENT PROCESS, ON THE ADMINISTRATIVE CAPACITY OF MANAGING AUTHORITIES, AND ON THE CAPACITIES OF A DIVERSE RANGE OF STAKEHOLDERS. THE MANAGEMENT OF ESIF INVOLVES A COMPLEX ECOSYSTEM OF ACTORS – FROM MULTIPLE LEVELS OF GOVERNMENT, TO PRIVATE FIRMS AND NON-PROFIT ENTITIES. CLEAR, EVIDENCE-BASED STRATEGIES ARE ESSENTIAL TO INTELLIGENTLY DIRECT ESIF TO WHERE THEY ARE MOST NEEDED AND LIKELY TO HAVE A POSITIVE IMPACT; EFFECTIVE CO-ORDINATION AND COMMUNICATION AMONG ACTORS, INCLUDING BENEFICIARIES, IS NECESSARY TO ENSURE THE MAXIMUM IMPACT FROM THE USE OF THE FUNDS; AND HAVING THE RIGHT SKILLS AND CAPACITIES IS CORE TO GOOD PROJECT MANAGEMENT. THIS CAN PROVE CHALLENGING AND THE ACTION SHOULD HELP ALLEVIATING RELATED OBSTACLES.	ERDF	125.000,00	The contractor should focus on the existing IPA management and control systems, and identify the administrative capacity needs and capacity-building actions necessary for each IPA country to bring their systems to a higher level of management performance within the Indirect Management system by Beneficiary Country (IMBC) and to align these systems with the broader post-accession Management and Control ecosystems, designed to support full and effective use of funds to strengthen economic, social and territorial cohesion. 22CPR112	Local governance mapping in the IPA countries	LOCAL GOVERNANCE MAPPING IN THE IPA COUNTRIES. THESE COUNTRIES NEED PARTICULARLY TO STRENGTHEN REGIONAL AND LOCAL INSTITUTIONS AND OVERCOME LOCAL GOVERNANCE GAPS.	ERDF	125.000,00	The local level is the place where direct democracy and civic representation are exercised, where services are provided, and where social and economic development takes place. Local governments play a critical role in shaping and developing the social and economic life of their territories, bringing communities together, and providing local solutions to local problems. The performance of local government, and how it interacts with citizens, affects the latter's behaviour as well as cohesion and trust within and among communities; this legitimises the local government's efforts and drives sustainable development. Inadequate local governance affects all citizens, but especially the vulnerable, often enhancing exclusion. Enhancing governance, popular engagement, transparency and accountability at regional and local levels should be a fundamental policy priority for the IPA countries' governments. ERDF	88.000,00	In line with the increased IPA allocation to the post 2020 Adrion programme, the Strategy will focus more and more on the EU enlargement agenda. At the same time, the Strategy must be modernised and synchronised with the new EU priorities, in particular the green and digital transitions, and the post COVID-19 recovery process. The Strategy should also better consider the "Youth" dimension, which is its future, and should accordingly be at the core of its modernised priorities.
