# Futher development

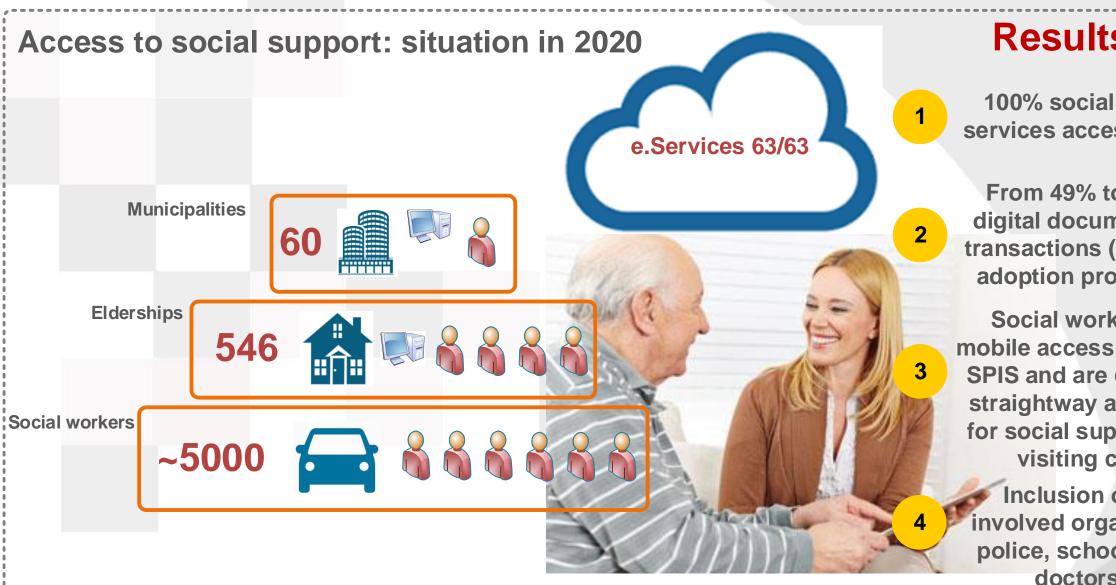

- 2 related Projects funded by EU structural funds
- "Increasing accessibility of social support"
- "Development of e-social services"

### AIMS OF THE PROJECTS

100% social support services accesed online

From 49% to 99% of digital documents and transactions (except for adoption procedures)

Social workes have mobile access (tablets) to SPIS and are capable of straightway application for social support when visiting clients

Inclusion of other involved organizations: police, schools, family doctors etc.

### ADVANTAGES OF THE SPIS

- Data exchange with other registers significantly simplifies the process of applying for social support, enabling the one-stop shop
- Provision of electronic public services increases the availability of social support, especially for people with disabilities
- Structured and up to date information on social support
