## Introduction

The Eurostat Labour Market Policy (LMP) database collects information on labour market interventions implemented by each of the EU Member States and Norway. Data are collected according to a comprehensive methodology, which classifies interventions into three main types – services, measures and supports – and into nine detailed categories according to the type of action (see below). Readers are recommended to refer to the LMP methodology <sup>1</sup> for details of this classification scheme and definitions of terms used in this report.

The LMP database collects quantitative data on expenditure and participants for each intervention. These are published annually and are available online from the Eurostat website <sup>2</sup>. The quantitative data are complemented by a set of qualitative information describing each intervention. This represents an invaluable source of reference to support a harmonised approach to the classification of national interventions and to help interpret the detailed figures on expenditure and participants. These qualitative data are compiled into a series of **Labour market policy statistics: Qualitative Reports** and produced as separate volumes for each country/year.

The reports all have the same structure:

- Part A Introduction

- Part B Inventory of interventions - a list of all interventions reported for the relevant year, grouped by type of action and including a national language version of the intervention name.

- Part C Qualitative information by intervention - presents the available information about each intervention in three sections: *Identification*, *Description*, and *Supplementary information*. The *Description* contains seven sub-sections: Aim, Beneficiaries/participants, Action/instrument, Financing/support, Eligibility, Legal basis, and Recent changes. The *Supplementary information* contains eight sub-sections describing the breakdown of expenditure, target groups, the treatment of unemployment spells, receipt of benefits, planned duration and other characteristics of the intervention. Together, these items summarise the qualitative information collected through the LMP questionnaire.

- Part D Reference data - provides a description of the populations considered as reference data within the LMP database, giving national definitions of those considered as registered unemployed and other groups registered with the public employment services (PES).

- Part E Abbreviations

The qualitative information in the LMP database is updated annually with the contribution of delegates from each country and Eurostat cannot take responsibility for the validity of the content. The reports are published annually by Eurostat in English and reports for other years that are not currently in the online library can be produced on request.

## D - Reference data

**R.1 Registered jobseekers (total)**

**27 Registered jobseekers**

**Definition:**

Registered jobseekers refers to all persons who have contacted National Agency for Employment (ANOFM) in the reference year with the aim of finding or changing a job and who may be or not registered unemployed.

**28 Registered unemployed**

**Overview:**

Refers to all persons who are registered with National Agency for Employment and at the same time fulfil the national criteria for consideration as registered unemployed:

- persons without work (with no work at all) aged more than 16 years
- currently available for work (persons who are sick are not counted)
- actively looking for either part time or full time job

Minimum age to be registered unemployed: 16

- Students cannot be RU. No specific stipulation exists in the legislation, but in practice, students cannot be RU during holidays either.
- There is a period of 60 days before school-leavers/first-time jobseekers can register.

Maximum age to be registered unemployed: 57/62

- Maximum age to be RU corresponds to the standard retirement age, which will be gradually increased between 2001 and 2014 as follows: up to 65 for men (raised from 62 years) and up to 60 years for women (raised from 57 years).
- UBR aged over 50 have to follow the same obligations that generally apply to seek work.

Registered unemployed are allowed to work? NO

- RU must be "out-of-work".

RU have to be immediately available for work? YES

Restrictions on the type of work sought (full/part-time, permanent/temporary, etc.)? NO

- No restrictions in this respect.

**Notes:**

- The working contract of RU must be ended at the initiative of the employer (including bankruptcy, restructuring). If the contract was ended at the person's initiative, she/he will not be considered as unemployed (if they register at the national Employment Agency, they are considered as jobseekers).

RU and UBR - Are all UBR counted as RU? YES

- It is obligatory to register as unemployed in order to claim UB.

RU and UBR - Do all RU receive benefits? NO

- RU must fulfil additional conditions to be entitled to receive UB.

Treatment of periods of activation during unemployment. Is the unemployment spell:

Continuous:

- Participants continue to be counted as RU during activation measures.

**32 Other jobseekers**

This category of persons is not stipulated by law or other regulations.

"Other registered jobseekers" was defined only in accordance with the LMP methodology.

The number of participants was calculated as difference between registered jobseekers (RJ) and registered unemployed (RU).

"Other registered jobseekers" will include inactive persons and also employed persons who have contacted ANOFM in the reference period, because there is the mandatory condition to be registered at the ANOFM in order to be participant to a certain
