

The EU-Implementation Committee

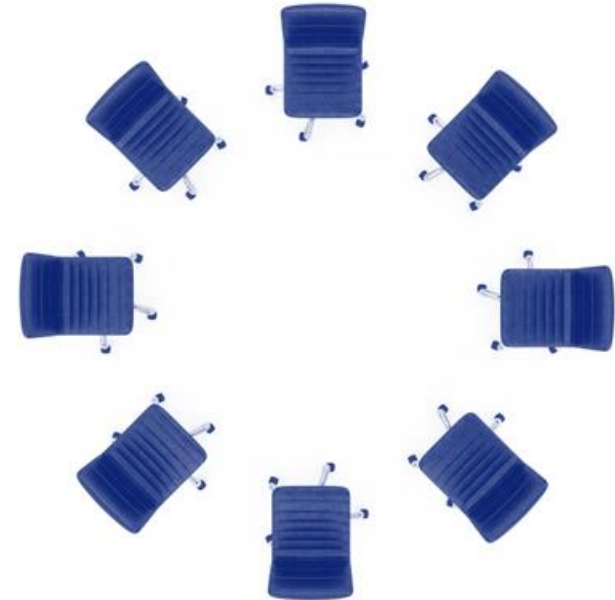

Permanent Secretary, Mr. Jakob Jensen

The Implementation Committee must: *“ensure a more systematic and uniform approach to implementing EU corporate legislation in order to avoid unnecessarily restrictive rules to the detriment of Danish companies and jobs”*

Members of the committee

- Minister for Employment (chair)
- Minister for Foreign Affairs
- Minister for Justice
- Minister for Industry, Business and Financial Affairs
- Minister for Energy, Utilities and Climate
- Minister for Taxation
- Minister for Transport, Building, and Housing
- Minister for Environment and Food

The 5 principles for implementation

1. Do not go beyond minimum implementation
2. Do not put Danish businesses at a disadvantage
3. Use flexibility and derogations where possible
4. Look for alternatives to regulation
5. Do not come into force before transposition deadline

3 core activities

1. Proactive political lobbying

- Identifying *future* EU regulation, where there is a need for early and proactive action to avoid unnecessary burdens.

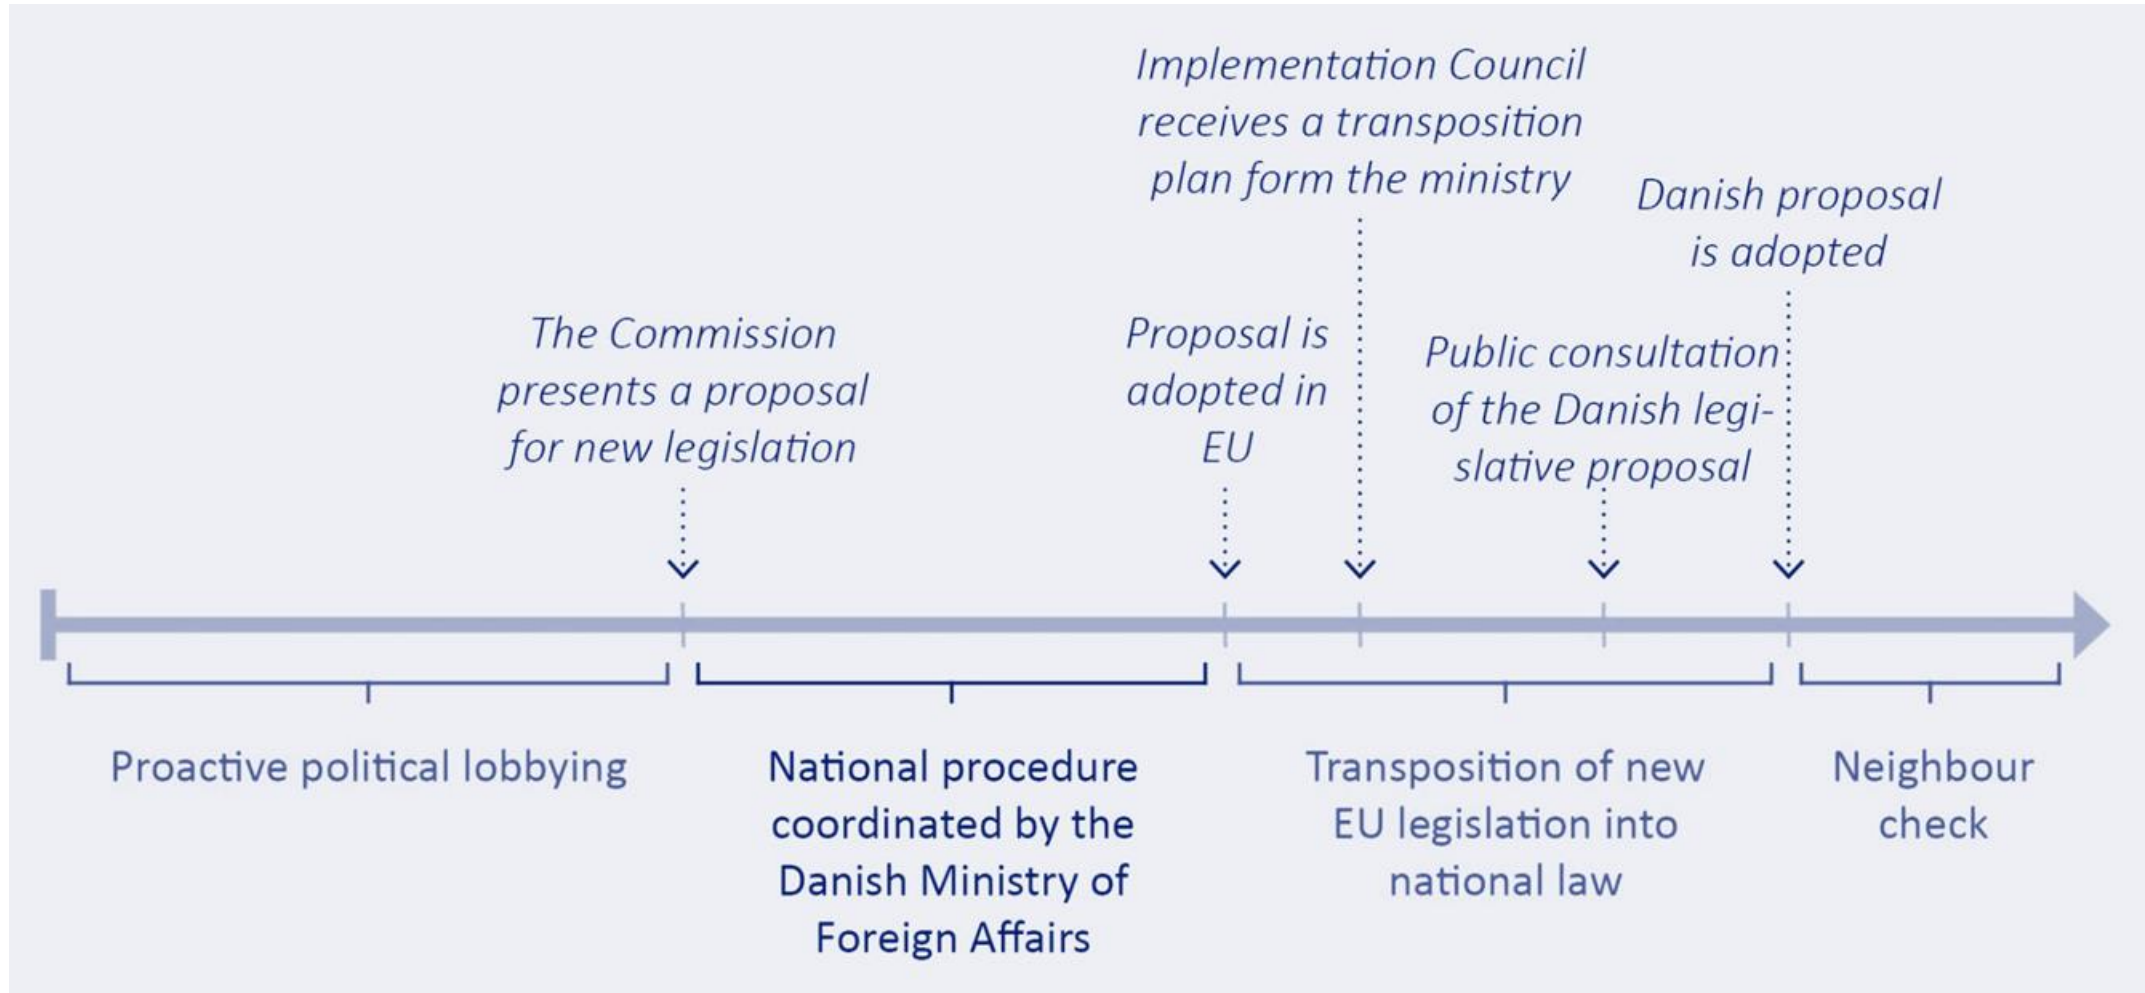

2. Implementing new EU legislation into national law

- Preventing unnecessary, potentially burdensome issues to be introduced when *new* EU legislation is transposed into Danish law.

3. "Neighbour check"

- Checking *existing* implementation of EU regulation against practices and approaches in other Member States in order to identify more efficient ways of implementation.

The steps

Results so far (2015-)

Activity	
Total number of laws and regulations implementing EU business regulation	173
<i>Of these the number of laws and regulations not harmonising with the 5 principles</i>	22
Cases with proactive political lobbying	47
Completed "Neighbour checks"	33

The road ahead

Thank you for your attention
