EU Skills Profile Tool for Third Country Nationals

A multilingual and free-for-use Tool intended for organisations offering assistance in mapping the skills and experiences of third country nationals.

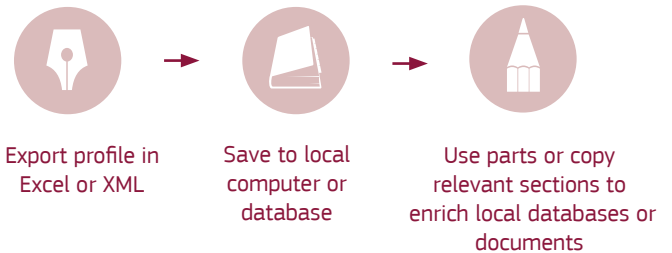

This document presents three ways in which the functionalities of the Tool can be combined with other systems:

1 Use the exportable electronic profile formats from the webbrowser of the Tool in your own system

Excel and / or XML

The questionnaire can be exported to Excel and to (machine-readable) XML formats. Specific information from profiles can be imported into other applications or documents and different profiles can be merged into one file.

For an example of how this is being done in practice, visit:
<https://tinyurl.com/ugghhpl>

2 Customise the EU Skills Profile Tool

Open Source

The EU Skills Profile Tool can be fully customised by modifying the **Open Source Code**.

Download the Open Source Code here:
<https://tinyurl.com/rpk2hro>

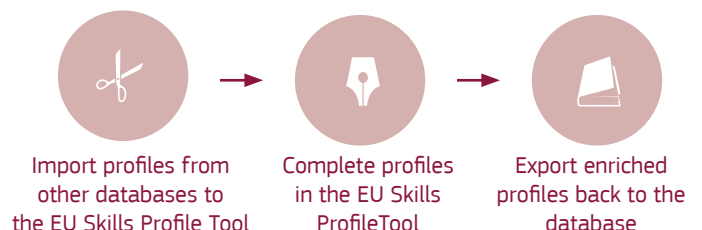

- Build your own customised version of the Tool by changing questions or specific parts of it.
- Reuse part of the questionnaire from the Source Code of the Tool in your own system.

3 Enrich your existing profiles or databases with parts of the Skills Profile Tool questionnaire

API*

The **Application Programming Interface** can be used for importing information from the EU Skills Profile Tool into existing databases, in order to enrich the Tool's questionnaire with other information from stakeholders' databases.

*Forthcoming in the end of 2020
