

# Application form - Pact for Skills

Fields marked with \* are mandatory.

## Introduction

---

The Pact for Skills is a shared engagement and approach to skills development. It is firmly anchored in the principles of the [European Pillar of Social Rights](#) and supports the goals of the [Green Deal](#) and the [digital transformation](#), as set out in the Commission communication "[A strong Social Europe for Just Transitions](#)".

The Pact aims to mobilise and incentivise private and public stakeholders to take concrete action for the **up skilling and reskilling of people of working age**, and, when relevant, pool efforts in the partnerships.

The Pact can be joint by any private or public organisation or partnership of organisations which aim to upskill or reskill people of working age.

The organisation(s) need(s) to be based in one of the Member States, EFTA or candidate countries.

Joining the Pact:

1. All stakeholders joining the Pact **sign up to the Charter** and its key principles, which they agree to respect and uphold.
2. Signatories of the Pact are invited to **translate their engagement into concrete commitments** on upskilling and reskilling. Commitments must be in line with the key principles and can be built around a number of "enablers" that illustrate concrete ways of implementing the different principles.
3. Commitments are monitored by at least one **key performance indicator**, e.g. number of people taking part in upskilling or reskilling.

Our institution, which was founded in 1782 under the name of Institutum Geometrico-Hydrotechnicum, has been the top higher education institution of Hungary and it also has well-established international reputation. The foundation of the effectiveness of the university is the devoted educational activities of our professors and the hard work and enthusiasm of our students. These values ensure the stability and continuity of education, scientific research and technological development at the institution. Students who feel talented and skilled may join various development projects already during their university years. When they continue their studies from the basic degree to the Masters qualifications we aim at fine-tuning their knowledge and skills so that it is ensured that they become excellent development and research engineers. Those who wish to proceed with their scientific studies may join PhD courses, which will provide sound basis and guiding framework to reach their professiona
