

Ex-ante publicity for middle-value contract VT/2021/049

Subject: Labour Market Policy database online interface

1. Purpose of the request for services

For the period 2021 – 2027, the EaSI programme will become a strand under the European Social Fund Plus (ESF+). The EaSI strand builds on the former EaSI programme 2014-2020, maintaining the focus on evidence-based policy-making and social experimentation, support to job mobility and the non-financial instrument activities related to the former Microfinance and Social Entrepreneurship axis.

EaSI is to support analytical activities (surveys, studies, statistical data, methodologies, classifications, micro-simulations, indicators, support to European-level observatories and benchmarks) to promote evidence-based policy making in the areas of employment and social policy.

The EU Labour Market Policies (LMP) database contains information on the labour market policy interventions implemented by the 27 EU Member States, Norway and the UK. Data are collected on an annual basis the database includes a time-series data since 1997 (for some countries). The LMP data collection contains three different types of data: qualitative data, quantitative data (on expenditure and participants) and the associated metadata. The new LMP web app will be used by our national focal points of the LMP data collection, the national LMP delegates, and other data providers in each country to support upload and revision of data. DG EMPL and other authorised personnel (e.g. of contractors supporting the LMP data collection process) will make use as well of the LMP data collection for validation of data, processing and preparation of data for dissemination.
