

Cyprus – online accreditation

The Human Resource Development Authority of Cyprus (HRDA) developed a system for the assessment and certification of Training Providers.

The aim of the System is to assess physical and legal entities dealing with the organisation and implementation of training activities or/and with the provision of infrastructure facilities for their implementation, to be certified as Vocational Training Centres, Vocational Training Facilities and Trainers of Vocational Training.

Certification through the System is compulsory for those who want to cooperate with the HRDA for the implementation of training activities.

Persons who want to become Trainers of Vocational Training must successfully go through the assessment and certification procedure following the System of Vocational Qualifications operated by the HRDA and acquire the Trainer of Vocational Training Qualification (EQF/CyQF 5, SVQ Level 5).

More information is available from the National Reference Point.

The information was gathered in 2021, for more up to date information on this case study, please check the national website.
