CALL FOR PROPOSALS EAC/S14/2018

Promotion of European values through sport initiatives at the municipal level

This call for proposals serves to implement the Preparatory action "Promotion of European values through sport initiatives at the municipal level" in accordance with the Commission Decision C(2018)1602/1 of 21 March 2018 on the adoption of the 2018 annual work programme for the implementation of pilot projects and preparatory actions in the area of education, sport and culture.

This preparatory action proposes to support organisations that promote sport initiatives at local level with the goal of disseminating the positive values of sport.

Values lie in the core of the European Union since the EU project was built on the common values of its Member States. Article 2 of the Treaty on European Union (TEU) states that the Union is based on the values of respect for human dignity, freedom, democracy, equality, the rule of law and respect for human rights, including the rights of persons belonging to minorities. In this context, Europe needs more cohesive and inclusive societies in order to allow citizens to play an active role in democratic life. By providing a sense of belonging and a strong attachment to the principles and traditions which constitute the heart of open societies, sport can be a powerful tool for promoting common values.

In this perspective, organisations that encourage and support European cities to invest in the promotion of sport and physical activity not only contribute to the health and well-being of local populations, but also to the enhancement of common European values amongst citizens. These organisations help municipalities throughout Europe to increase the number of people who practice sport and physical activity, to integrate communities, to favour investment in sport, and to build bridges with other sectors such as education, health, social affairs, and tourism.

Support for organisations aiming at the promotion of sport and physical activity at municipal level has to be developed, in particular in the context of the European Capital, City, Community and Town of Sport since their action benefits to all citizens. There is a strong interest in our society to support organisations that work all year round active in this field, in terms of capacity building, networking and capacity to develop concrete projects at local level. This support can take different forms. All of them contribute to the promotion of the positive values of sport.
