BASE METALS AND ARTICLES OF BASE METAL

CHAPTER 72

Iron and steel

Definition

For the purposes of this Chapter, the expressions "cold-rolled (cold-reduced)" and "cold-formed" mean cold reduction resulting in changes to the crystalline structure of the workpiece. The expressions do not include very light cold-rolling and cold-forming processes (skin pass or pinch pass) which act only on the surface of the material and do not result in change to its crystalline structure.

Chapter Note

For the purposes of this Chapter, a change of classification resulting only from cutting is not to be considered as origin-conferring.

Chapter residual rule:

Where the country of origin cannot be determined by application of the primary rules, the country of origin of the goods shall be the country in which the major portion of the materials originated, as determined on the basis of the value of the materials.
