NAVIGATING THROUGH WITH THE PEFC FOREST CERTIFICATION

Marta MARTINEZ PARDO | Maja DRCA

PEFC INTERNATIONAL

September 2024

PEFC - Programme for the Endorsement of Forest Certification

PEFC Collective strength for the largest scale of certified area and material

- Global, not-for-profit, non-governmental organization
- Alliance of national forest certification systems
- Founded in 1999 in response to smallholders' requirements
- We set international standards and endorse national forest certification systems

- PEFC members with endorsed systems
- PEFC members progressing toward endorsement
- *Russia & Belarus*
- Countries where chain of custody certificates have been issued

Source: PEFC data March 2024

Over **296*** million hectares PEFC-certified
= **76%** of global certified forests
from endorsed systems stretched over
49 countries

Traceability through over
28,400 PEFC-certified sites
in **80+** countries

Overarching PEFC EUDR solution

ENABLERS

Designed together with external stakeholders: in working groups with diverse expertise

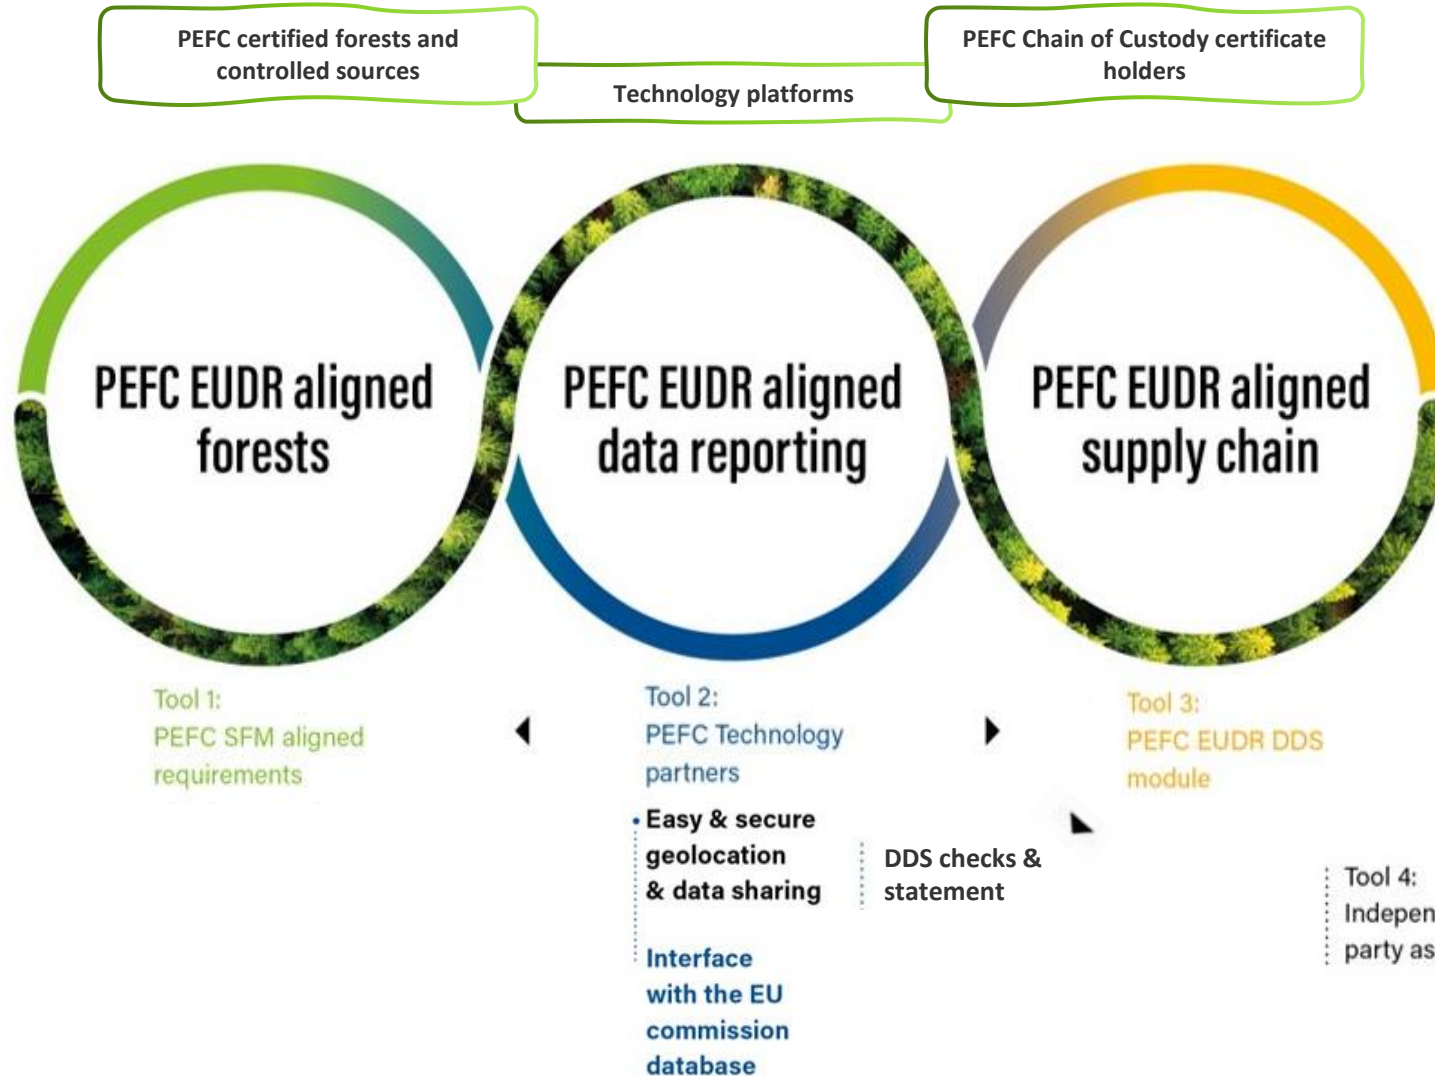

Powered by PEFC National Members

Supported by technology partners: LiveEO, osapiens, Deeplai

Audited by respective Certification Body PEFC trained auditors

TIMING

- Tool 1** | 2025 onwards through revision of PEFC national standards
- Tool 2** | Q4 2024 onwards
- Tool 3** | Q4 2024 onwards
- Tool 4** | Q4 2024 onwards

PEFC EUDR DDS

- **GLOBAL SCOPE**
implementation by any company within the supply chain & worldwide application. Including PEFC certified and uncertified materials
- **FLEXIBILITY**
adaptation with diverse business needs: companies define the products they will cover
- **COMPREHENSIVE SOLUTION**
building on existing PEFC CoC standard enables synergies with other PEFC solutions (e.g. RED II)
- **SECURE AND SUITED DATA SHARING**
integration with softwares partnering with PEFC, internal systems or other providers

Requirements for the Implementation of PEFC EUDR Due Diligence System (PEFC EUDR DDS)

PEFC EUDR DDS

DDS STEPS

- Collection of information
- Risk assessment
- Substantiated concerns
- Risk mitigation
- No placement on the market

COLLECTION OF INFORMATION

- Enabling traceability to the plot of land
- EUDR related data to be passed on throughout the supply chain
- Partnering with different softwares that ease the transfer of the information

RISK ASSESSMENT

Covering each of the following risks:

- Illegality
- Deforestation and forest degradation
- Controversial sources
- Mixing at supply chain level

RISK MITIGATION

- Detailed set of requirements, including information request, audits and corrective measures
