

# Redistribution in the current CAP

CDG meeting of 25 June 2025

*AGRI B.1*

# Vision for Agriculture and Food

## Fairer and better targeted public support

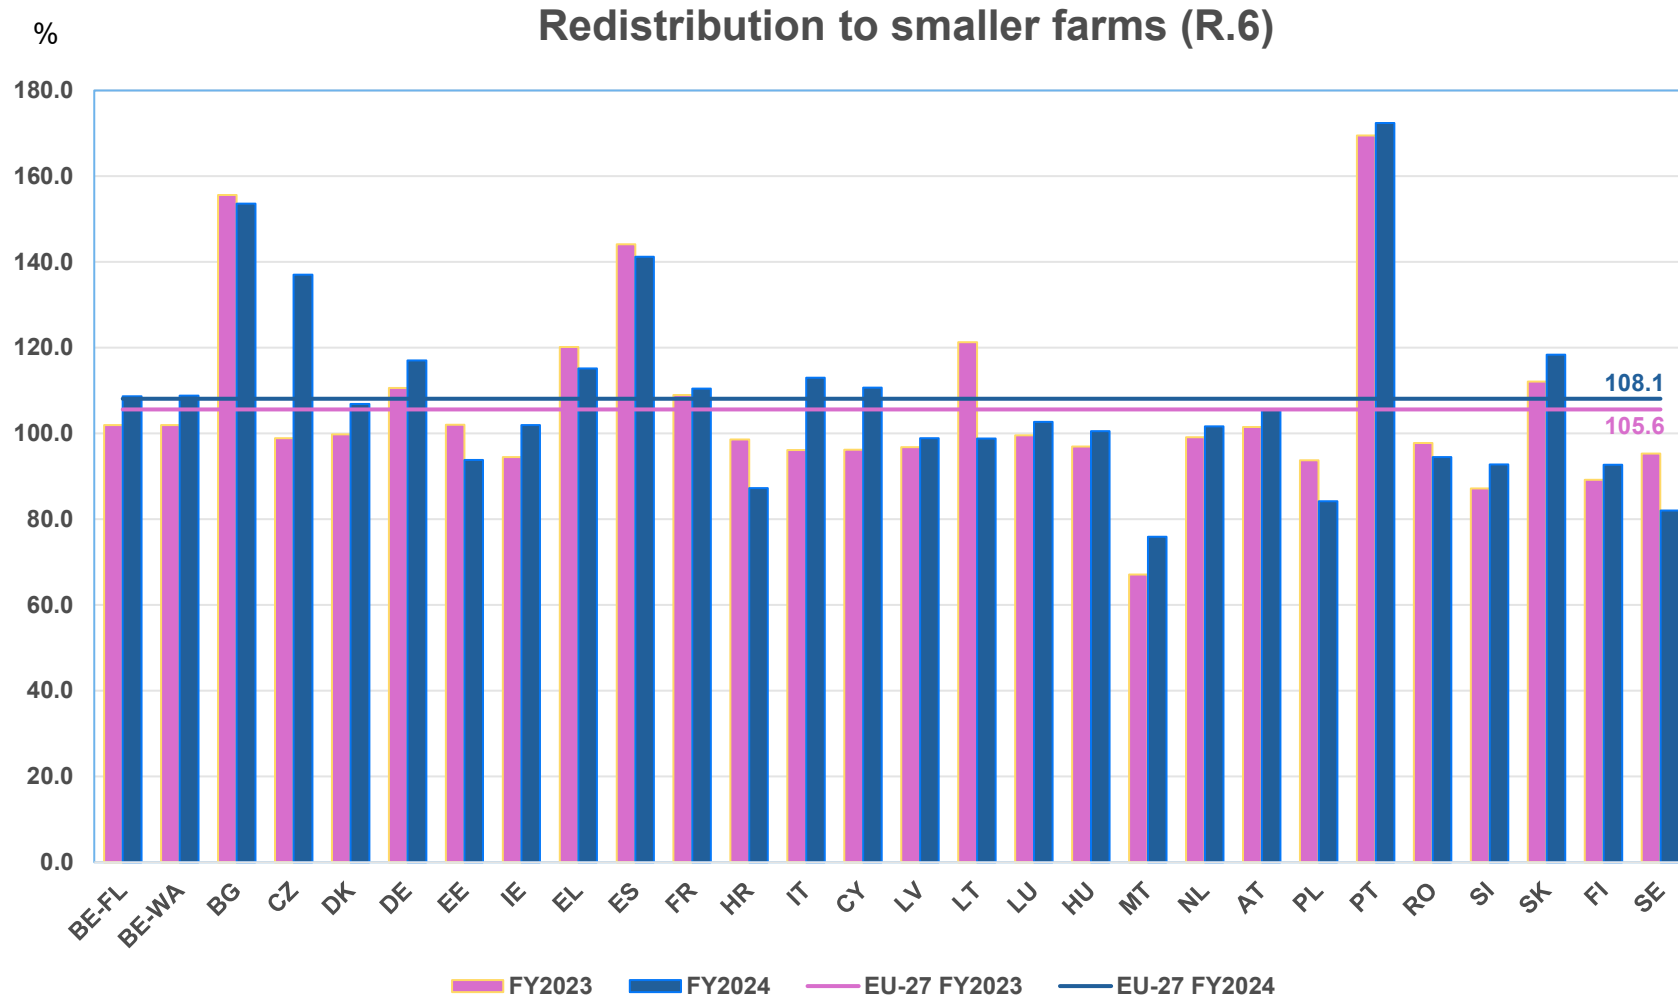

- CAP remains essential to support farmers' income
- Simpler and more targeted CAP, more directed towards:
  - farmers that actively engage in food production,
  - the economic vitality of farms
  - the preservation of our environment
- Support further directed towards those farmers who need it most
  - With a particular attention to the farmers in areas with natural constraints, young and new farmers, and mixed farms

# Redistribution of DP to smaller farms: Latest results (1)

- R.6 indicator
  - The average additional direct payments (DP) per hectare granted to beneficiaries below average farm size, compared to the average DP per hectare granted to the entire population of beneficiaries

- R6 value = 
$$\frac{\text{avg} \frac{DP}{ha}(\text{beneficiaries below avg farm size})}{\text{avg} \frac{DP}{ha}(\text{all beneficiaries})} * 100$$

# Redistribution of DP to smaller farms: Latest results (2)

Source: DG AGRI

## Redistribution of DP to smaller farms: Latest results (3)

- R.6
  - synthetic indicator
  - redistributive impact ( + and -) of all DP instruments and interventions (not only CRISS)
- R.6 value: +2.5 p.p. between FY2023 and FY2024
- $\Delta(R6) > 0$  in 19 CSPs (improvement w.r.t. FY2023 benchmark)
- Largest increases w.r.t. FY2023 benchmark: CZ, IT, CY

## Redistribution of DP to smaller farms: Latest results (4)

Assessment	Member States
Over-achieved	IT, BE-FL, PT, FR, CY, DE
Achieved (+/- 1 p.p. from FY2024 milestone)	AT, BE-WA, LU, DK, EL
Below FY2024 milestone but overall positive achievement	BG, CZ, SK, ES
Below FY2024 milestone but above 100% and FY2023 benchmark	NL, IE, HU
Below FY2024 milestone, below 100% but above FY2023 benchmark	LV, FI, SI
Below FY2024 milestone, below 100% and FY2023 benchmark	SE, HR, RO, PL, EE, LT

- Under-achievement in 1/3 CSPs, mostly due to low uptake of ecoschemes by smaller farms (i.e. instances of trade-offs between redistribution and environmental objectives)
