

# CESNI – Functioning, Achievements, Outlook

Bruno Georges, Executive Secretary

# Main achievements

- Productive cooperation, notably between European experts & shipping industry, with concrete results
- Joining of forces & reducing duplication of work (better governance)

## Technical requirements

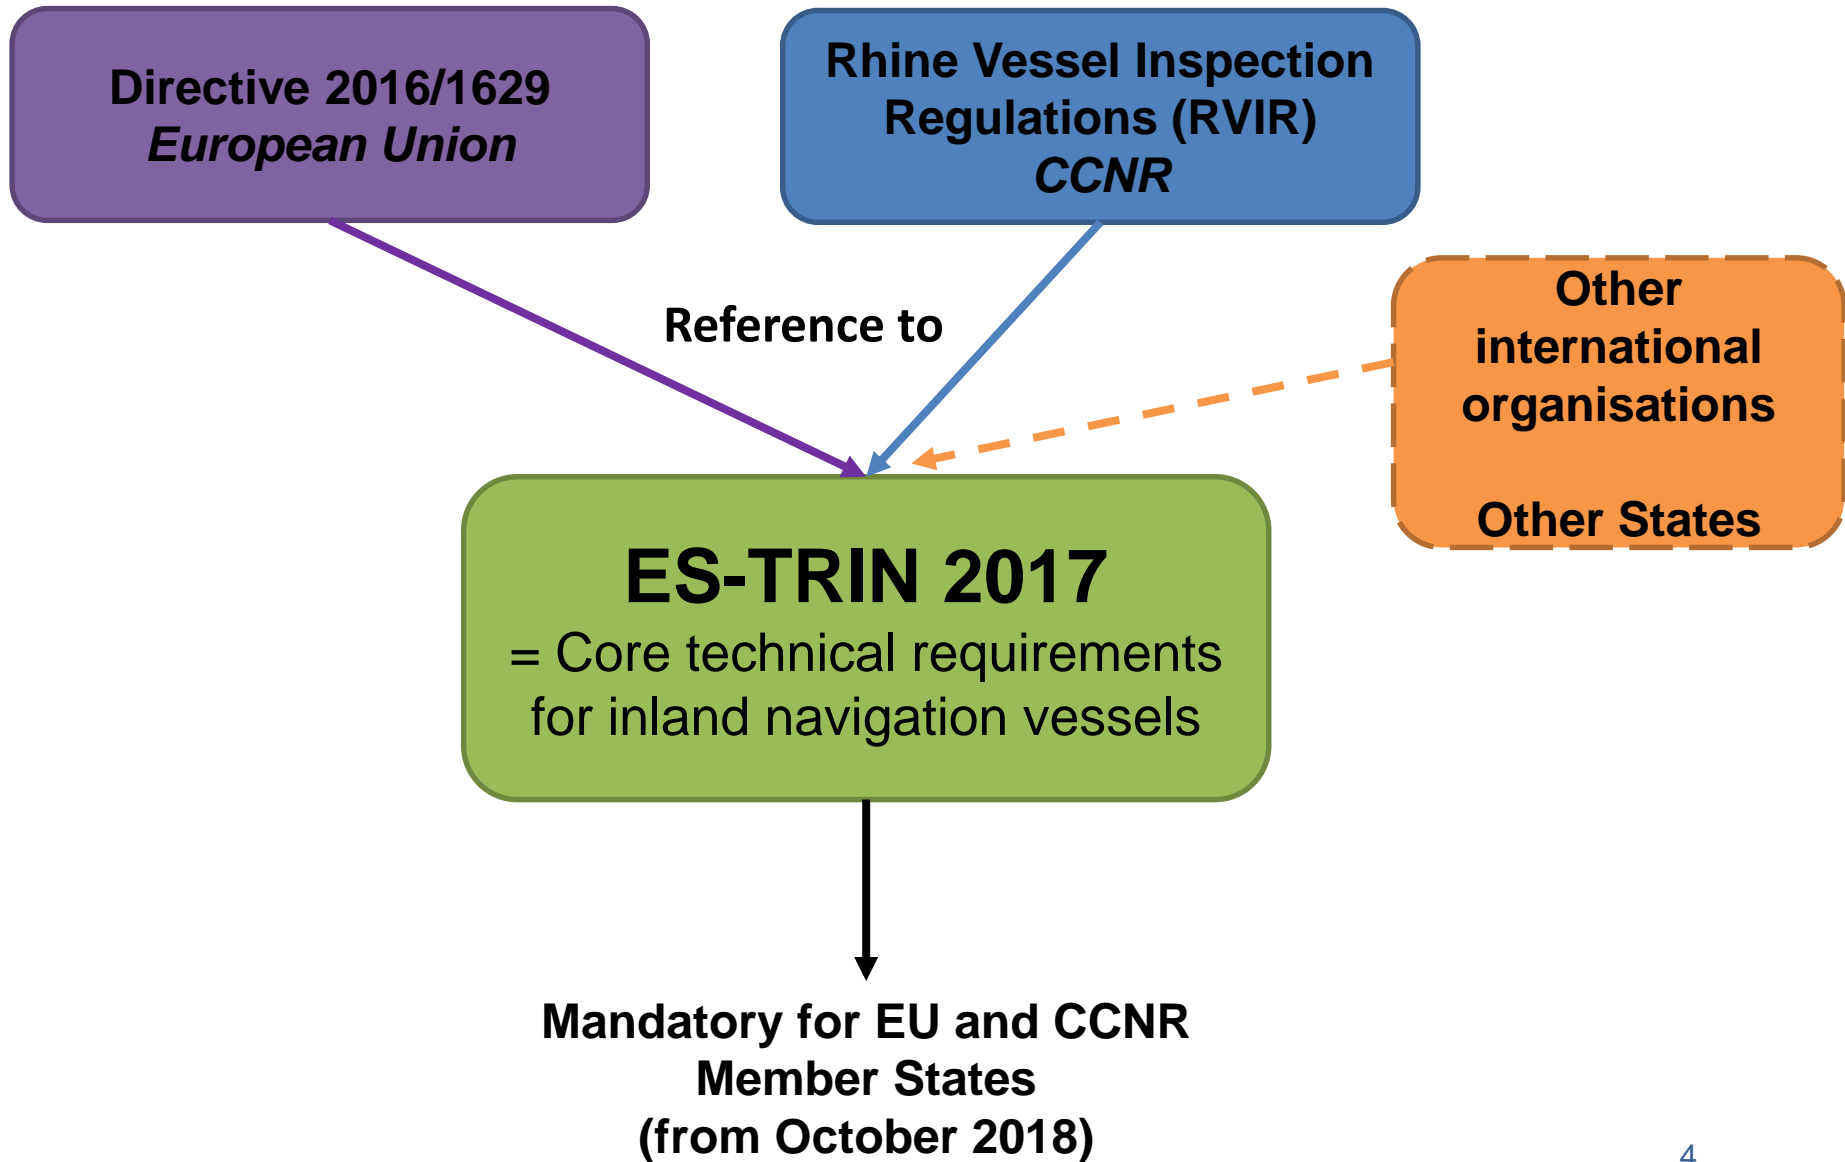

2 standards submitted to Committee for adoption in July 2017

- ES-TRIN 2017 (European Standard laying down Technical Requirements for Inland Navigation vessels)
- Inland AIS Test Standard

## Professional qualifications

Significant progress towards standards

- on competencies – temporary working group submitted first draft
- for medical fitness – temporary working group submitted first draft
- on definition of technical requirements applicable to simulators used for examination purposes – important progress with 3 meetings of the temporary working group in 2017

# Outlook

## Continuation & Maintenance

- Adopting standards in various fields, in particular as regards vessels, information technology and crew, to which respective regulations may refer

## Implementation

- Deliberating on uniform interpretation & application of standards, on the method for applying and implementing the corresponding procedures, on procedures for exchanging information, & on the supervisory mechanisms among Member States

## Innovation

- Deliberating on derogations & equivalences of technical requirements for specific craft

## New Priorities

- Deliberating on priority topics regarding safety of navigation, protection of the environment, & other areas of inland navigation

# Thank you for your attention
