

List of projects to be considered in the framework of the EU-China Connectivity platform

Disclaimer:

The TEN-T related projects included in the attached list have been presented by the Member States concerned on a voluntary basis, in order to explore solutions to cover a potential financing gap, without prejudice of the final decision on financing which could be taken. The importance of a level-playing-field among investors and project promoters, of a geographically balanced list of projects, reciprocity and compliance with applicable EU rules and standards was recalled during the Pilot Expert Group meetings. As agreed in the minutes of the Chairs' meeting a rolling implementation mechanism will be set up in view to evaluate the list of jointly identified pilot projects.

i – In MS and neighbouring countries.

- 1. The North Sea Baltic Corridor (Latvia) comprising the following sub-projects:*
