SPECIFICATIONS

1. Introduction

1.1. Weights and dimensions of heavy-duty vehicles operating international and national transport in the EU are ruled by Directive 96/53/EC. This Directive aims at ensuring fair competition between hauliers, ensuring that transport operations may not be refused between two Member States on the basis of the dimensions of the vehicle used. There is now a case to adapt these rules which were put together during the 1990's. The Commission announced in its White Paper on Transport presented on 28 March 2011 that urgent action needs to be taken to make road transport more resource-efficient and to further integrate the various transport modes to achieve a Single European Transport Area. In keeping with these objectives, the White Paper announced that the legislation on weights and dimensions should be reviewed to adapt it to new technologies and needs, and to facilitate intermodal transport and the overall reduction of energy consumption and emissions.

This revision of the Directive will have to be adopted by the European Parliament and the Council. It will be supplemented in due time by an adaptation to technical progress of the type-approval requirements on masses and dimensions for heavy-duty vehicles (which defines standards to be complied with for the commercialisation of new vehicles) within the framework of Regulation 661/2009 and Directive 2007/46/EC.

1.2. At the moment, the revision process focuses on the 5 following topics:

- improvement of the aerodynamics of trucks in order to reduce their fuel consumption and their CO2 emissions. This improvement might take place through the addition of flaps at the rear of the vehicle and a possible reshaping of the trucks cabins;
- encourage multimodal transport via a short increase in the length of the trailers to accommodate some larger standardized containers (45' long);
- adaptation of the weight of coaches, in order to take into account the electrification of urban coaches and the hybridisation of the propulsion of inter-urban coaches;
- definition of procedures and means for the enforcement of offences against the Directive 96/53.
- clarification of the current Directive (essentially its article 4) on the issue of cross border movement of heavier or longer vehicles than those permitted by the Directive.

A legislative initiative amending Directive 96/53 is expected at the beginning of 2013.

The issue highlighted here above in bold is the topic of this call for tender. For this topic, the Commission is considering creating a group of experts to define – in coordination with the Commission - essential requirements and performance-based criteria for a new design of the...

---

1 Council Directive 96/53/EC of 25 July 1996 laying down for certain road vehicles circulating within the Community the maximum authorized dimensions in national and international traffic and the maximum authorized weights in international traffic

tractors and trailers in order to reduce their fuel consumption and CO2 emissions. It is expected that this new design may also bring improvements in terms of road safety and comfort of drivers.

2. **Purpose of the contract**

The objective of the contract is to provide technical assistance to the Commission for the management of this working group. The working group will be made up of experts in aerodynamics and mechanics coming from the Member States, national technical centers, vehicle manufacturers, research institutes, end user groups, and other interested stakeholders.

The aim of the working group will be to:

- Within the framework of the revised Directive 96/53/EC, define essential requirements for the design of tractors and trailers. These requirements must allow vehicles to meet the objectives of CO2 and fuel consumption reduction by reducing aerodynamic drag whilst respecting the constraints imposed by infrastructure geometry, safety rules and requirements for all road users, driver comfort, legal obligations on road transport (for instance mandatory implementation of onboard equipment like digital tachograph, sensors for the measurement of the transport conditions of livestock …)

- Update regularly these essential requirements to technical progress at a rhythm of about one annual working party of this expert group.

The contractor will:

- Assist the Commission in monitoring the work of the expert group, inviting participants, preparing meetings (support in drafting agendas, working documents, logistical organisation if needed), providing food for thought with research, reports and working papers, evaluating qualitatively and quantitatively the feasibility and the impacts of possible proposals appearing during the debates, organising concertation between stakeholders, preparing minutes of meetings, drafting summaries of the results of the sessions, assisting DG MOVE in reporting to the Council, European Parliament, Committee of the Regions, European Economic and Social Committee on the final results of the working group.

- Assist the Commission by providing its expertise on any request of the Commission related to the topic of the expert group.

The experts who will carry out the assignment shall sign a declaration of confidentiality and impartiality before the start of their mission and carry out their work with appropriate discretion.

The duration of the initial work of the expert group is deemed not to exceed one year ± 2 months. This contract shall cover only this first session of the expert group, until the first version of the essential requirements are defined. The yearly updates of the essential requirements are not covered by this contract.

3. **Reports and documents to produce**

Execution of the tasks begins after the date on which the Contract enters into force. The working group is expected to start working at the beginning of 2013.
In principle, the deadlines set out below cannot be extended. The Contractor is deemed solely responsible for delays occasioned by subcontractors or other third parties (except for rare cases of force majeure). Adequate resources and appropriate organisation of the work including management of potential delays should be put in place in order to observe the timetable below.

A kick-off meeting will take place in Brussels, at the latest 30 days following the signature of the contract, in order to settle all the content-related and organisational details of the work to be undertaken.

3.1. Reports

The assistance will take the form of the provision of expertise upon request. A proactive role of the contractor is expected in terms of proposals to the Commission on the form and substance of the work of the expert group. As described above, the tasks performed will be constituted amongst others of:
- meetings and brainstorming sessions with the Commission staff;
- working papers;
- minutes of meetings.

A first progress report showing progress of the work shall be submitted to the Commission at the latest 6 months after the date of signature of the contract. It will gather all the documents, notes, slides … provided to the Commission during the first 6 months of the contract.

The Commission shall have twenty days from receipt to approve or reject the report. Within 20 days of receiving the Commission’s observations, the Contractor will submit additional information or another report.

3.2. Final report

The contractor will submit a final progress report to the Commission at the latest 13 months after the signature of the contract. This final progress report will complete the first one with the same kind of documents for the last months of the contract.

The Commission shall have twenty days from receipt to approve or reject the final progress report, and the Contractor shall have 20 days in which to submit additional information or a new final progress report.

3.3. Report format and publication

1 copy of the reports shall be supplied in paper form and one copy in electronic form, either in MS Word or Powerpoint, depending on the file type.

The Commission may publish the results of the study. For this purpose, the tenderer must ensure that there are no restrictions based on confidentiality and/or intellectual property rights are expected from the third party. Should he intend to use the study data, which cannot be published, this must be explicitly mentioned in the offer.

4. Duration of the tasks

The duration of the tasks shall not exceed 14 months, taking into account possible delays of up to 2 months in the definition of the essential requirements. This period is calculated in calendar days.
5. **Place of performance**

The tasks will be performed on the Contractor’s premises. However, meetings between the contractor and the Commission may be held on Commission premises in Brussels. It is estimated that during this period of one year, the expert group shall meet at between 6 and 10 times, each time for a one day session.

6. **Estimate of the amount of work involved**

The amount of work involved to carry out this contract is assessed at 50 man-days.

7. **Terms of contract**

In drawing up his offer, the tenderer should bear in mind the provisions of the draft contract attached to this invitation to tender (Annex 5). Any limitation, amendment or denial of the terms of contract will lead to automatic exclusion from the procurement procedure.

The Commission may, before the contract is signed, either abandon the procurement procedure or cancel the award procedure without the tenderers being entitled to claim any compensation.

8. **Terms of payment**

Payments shall be made in accordance with article I.4. of the Contract.

9. **Structure of the tender**

All tenders must include three sections i.e. an administrative, a technical and a financial proposal.

9.1 **Section One: administrative proposal**

This section must provide the following information, set out in the standard identification forms attached to these tender specifications (Annexes 1, 2 and 3):

- **Tenderers’ identification (Annex 1)**
  
  - All tenderers must provide proof of registration, as prescribed in their country of establishment, on one of the professional or trade registers or provide a declaration or certificate.
  
  - If the tenderer is a natural person, he/she must provide a copy of the identity card/passport or driving licence and proof that he/she is covered by a social security scheme as a self-employed person.

- **Financial identification (Annex 2)**

  The bank identification form must be filled in and signed by an authorised representative of the tenderer and his/her banker. A standard form is attached in Annex 2 and a specific form for each Member State is available at the following Internet address:
- Legal entities (Annex 3)

The legal entity form in Annex 3 must be filled in and should be accompanied by a number of supporting documents, available on the Web site:

http://ec.europa.eu/budget/contracts_grants/info_contracts/legal_entities/legal_entities_en.cfm

The Commission reserves the right, however, to request additional evidence in relation to the bid submitted for evaluation or verification purposes within a time-limit stipulated in its request.

9.2 Section Two: Technical proposal

The technical proposal must provide all the information needed for the purpose of awarding the contract.

9.3 Section Three: Financial proposal

All tenders must contain a financial proposal. The tenderer's attention is drawn to the following points:

- Prices must be quoted in euros, including the countries which are not in the euro-area. As far as the tenderers of those countries are concerned, they cannot change the amount of the bid because of the evolution of the exchange rate. The tenderers choose the exchange rate and assume all risks or opportunities relating to the rate fluctuation.

- Prices must be fixed amounts and include all expenses, such as travel expenses and daily allowances.

- Prices should be quoted free of all duties, taxes and other charges, i.e. also free of VAT, as the European Union is exempt from such charges in the EU under Articles 3 and 4 of the Protocol on the Privileges and Immunities of the European Union of 8 April 1965 (OJ L 152 of 13 July 1967). Exemption is granted to the Commission by the governments of the Member States, either through refunds upon presentation of documentary evidence or by direct exemption. For those countries where national legislation provides an exemption by means of a reimbursement, the amount of VAT is to be shown separately. In case of doubt about the applicable VAT system, it is the tenderer's responsibility to contact his or her national authorities to clarify the way in which the European Union is exempt from VAT.

- Prices shall be fixed and not subject to revision during the performance of the contract.
