HOW DO WE ACHIEVE OUR GOALS?

KNOWLEDGE AND OPPORTUNITIES

**HOW?**
- Through vocational training;
- Through employment services;
- Through skills development;
- By providing formal, informal and non-formal education opportunities;
- By granting on-the-job training opportunities.

**WHY?**
In order to equip youth with the skills necessary to manage the transition to productive adulthood, there is a need to increase their active engagement in the economic and social life of their communities, and thereby heighten their sense of self-esteem.

REDUCE TENSIONS

**HOW?**
- Through interventions that aim to increase youth engagement in public life;
- Through quick impact projects to improve local infrastructure;
- By facilitating youth partnerships with decision-making bodies;
- By providing formal, informal and non-formal education opportunities.

**WHY?**
In order to reduce tensions in host communities, there is a need to empower and increase the positive relationship between youth and different community groups.

Trained youth will be able to design, implement and monitor local infrastructure projects, social cohesion and peace-building activities. They will also lead youth policy roundtables in Brussels, Lebanon and Jordan.
